AI-Powered Sales Intelligence

Business Value Analysis — Genie AI Sales Advisor for MedTech Commercial Teams

April 2026

Confidential

VALUE PROPOSITION

What If Every Sales Rep Had an AI-Powered Analyst on Demand?

Instant Intelligence

Replace hours of spreadsheet work with natural language questions answered in seconds — from surgeon volumes to competitive positioning to upgrade pipeline.

Revenue Acceleration

Surface hidden opportunities across $129M in pipeline by connecting procedure data, account targeting, and product upgrades in a single AI-powered view.

Zero Tool Sprawl

Built on the platform J&J already runs at scale — no new vendors, no new contracts, no new security reviews. Data, analytics, and AI in one governed environment.

In short: An AI that turns chat and voice into insights from structured enterprise data — giving MedTech commercial teams a competitive edge without adding complexity to the technology landscape.

VALUE PROPOSITION

Three Pillars of Business Value

1

Sales Productivity

Reps spend time selling, not searching. AI handles the data work — pre-call prep, territory analysis, and opportunity identification in seconds.

2

Top-Line Revenue

AI-driven targeting surfaces upgrade, competitive, and expansion opportunities that would otherwise go unnoticed across the $129M pipeline.

3

Lower Total Cost

Consolidate fragmented BI tools, spreadsheets, and ad-hoc databases onto the unified platform J&J already operates at enterprise scale.

AGENDA

What We'll Cover

01 **The Challenge**
Why the status quo isn't working

02 **The Partnership**
J&J + Databricks at scale

03 **The Solution**
Ask Genie AI Sales Advisor

04 **Platform In Action**
Live demo screenshots

05 **Sales Productivity**
Time savings & efficiency gains

06 **Revenue Growth**
Pipeline visibility & targeting

07 **Unified Platform & TCO**
Consolidation & governance

08 **ROI & Next Steps**
Business case & path forward

THE CHALLENGE

Sales Reps Spend More Time Searching Than Selling

Commercial teams struggle with fragmented data, siloed tools, and manual reporting—costing time and revenue.

🔍

Data Fragmentation

Procedure volumes, upgrade opportunities, and account targets live in separate spreadsheets with no single view

⏰

Time-to-Insight

Reps spend 30-40% of their week compiling reports instead of engaging with surgeons and accounts

📈

Missed Opportunities

Without real-time analytics, upgrade and competitive opportunities go unidentified until it's too late

STRATEGIC FOUNDATION

A Deep, Multi-Year Strategic Partnership

~700
Workspaces
Across MedTech, Pharma, Consumer Health & global regions

4,000+
Monthly Active Users
Active platform users across business units and geographies

20+
Product SKUs
From core engineering to AI/ML, Vector Search & Model Serving

Global
Reach
J&J US, China, Services & cross-BU deployments

Enterprise Databricks Service

A dedicated enterprise team provisions and supports the Databricks platform across all of J&J — ensuring governance, security, and operational excellence at global scale.

MedTech Data Strategy

Led by VP of Data Strategy **Satish Maduri**, the MedTech data organization drives Databricks-powered initiatives — from clinical data pipelines to AI-powered tools like the Sales Genie advisor.

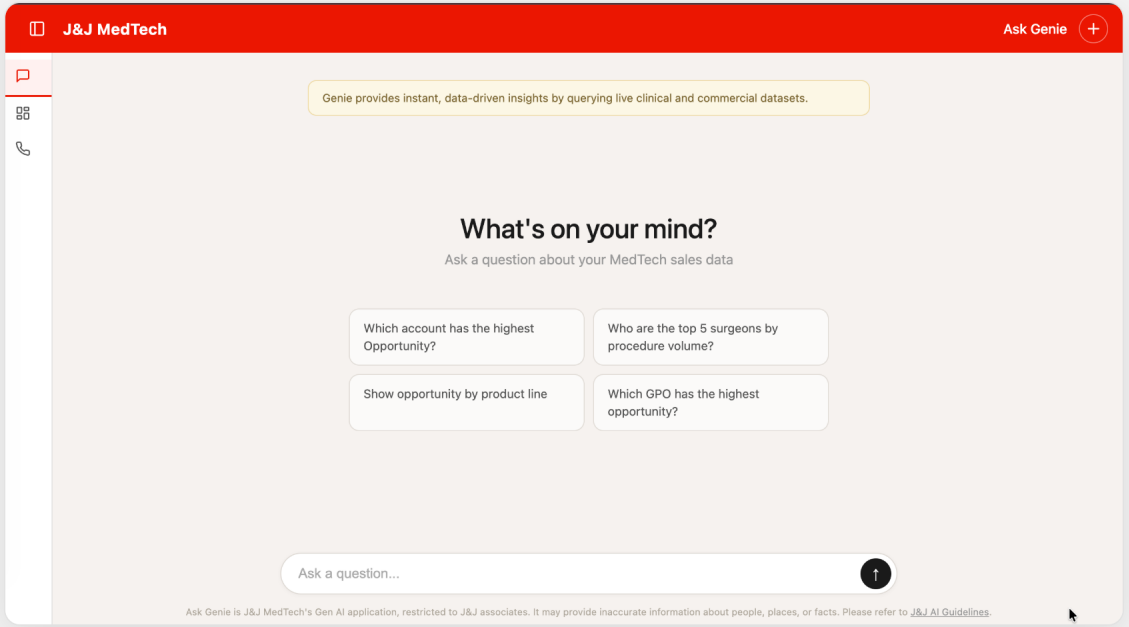
J&J is one of the most sophisticated Databricks customers in Life Sciences, leveraging the full Lakehouse architecture with a shared vision of unifying data and AI on a single governed platform.

THE SOLUTION

Ask Genie — AI Sales Advisor

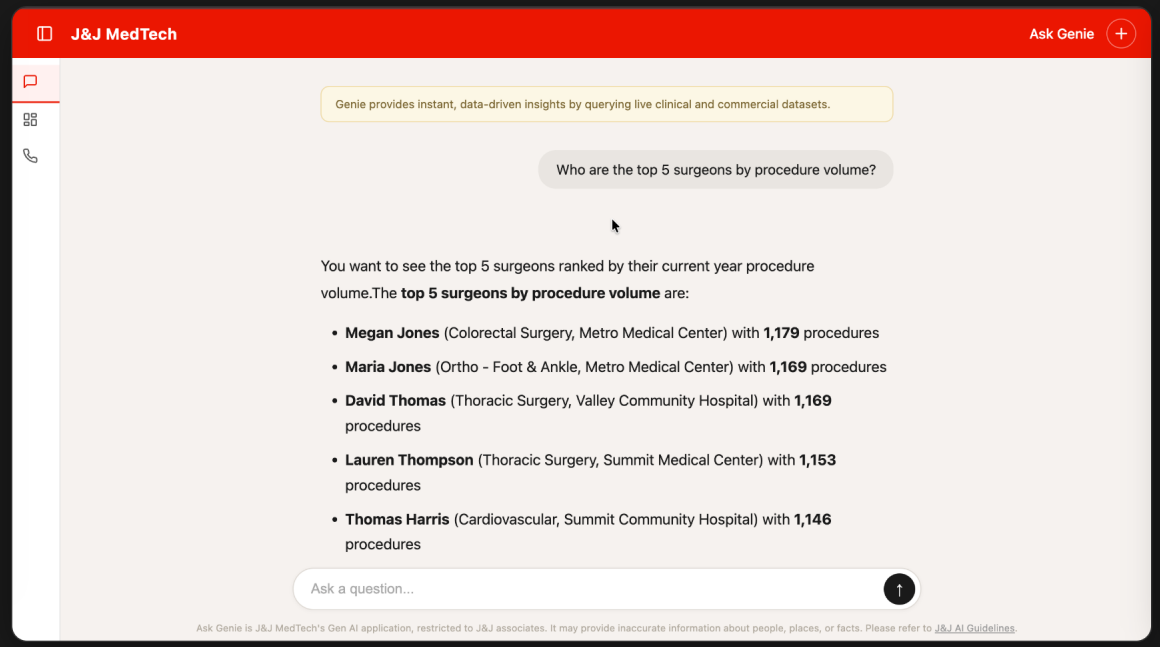
Natural language access to all MedTech sales data. Ask a question, get an answer — no SQL, no spreadsheets, no waiting.

- **Natural language queries** — "Who are the top 5 surgeons by procedure volume?" answered instantly
- **Unified data model** — HCP volumes, product upgrades, and account targeting in one place
- **Built-in dashboards** — $129.6M total opportunity, 75 accounts, 310K units at a glance
- **Follow-up suggestions** — AI recommends the next question to deepen analysis
- **Governed & secure** — Restricted to J&J associates with full audit trail

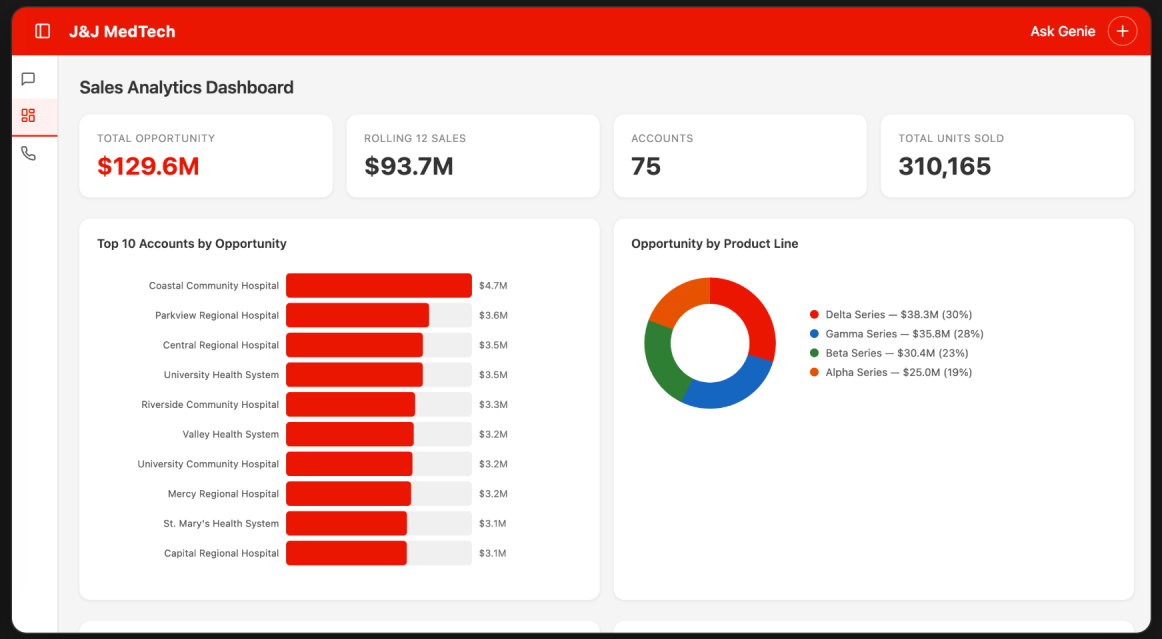


PLATFORM IN ACTION

From Question to Insight in Seconds



AI-generated surgeon rankings with procedure data



Opportunity dashboard — $129.6M across 4 product lines

VALUE PILLAR 1

Increase Sales Team Productivity

70%
Less Time on Reporting
From hours of spreadsheet work to instant AI answers

5x
Faster Account Prep
Pre-call planning reduced from 45 min to under 10 min

+12hrs
Selling Time / Week
Per rep, redirected from data gathering to customer-facing activities

100%
Self-Service Analytics
Zero dependency on analysts for standard sales questions

Before — Manual Process

- ✗ Export CSVs from 3 different systems
- ✗ Manually cross-reference account & HCP data
- ✗ Build pivot tables for territory reviews
- ✗ Email analysts for custom reports (2-3 day wait)

After — Ask Genie

- ✔ Ask a question in plain English
- ✔ Unified data across all 3 datasets instantly
- ✔ AI-powered follow-up suggestions
- ✔ Real-time dashboards always current

VALUE PILLAR 2

Drive Top-Line Revenue Growth

AI-powered targeting surfaces hidden opportunities across $129.6M in pipeline.

Revenue Impact by Opportunity Type

How Genie Unlocks Revenue

Prioritized targeting — AI identifies highest-value accounts by penetration gap and trend

Competitive intelligence — Instant visibility into competitive accounts by GPO and territory

Surgeon-level insights — Procedure volume trends by specialty enable precise engagement

Market expansion — YoY growth metrics identify under-penetrated areas for expansion plays

Unified Platform, Lower Total Cost

Consolidate fragmented tools onto one governed platform — reducing cost, complexity, and risk.

Eliminate Tool Sprawl

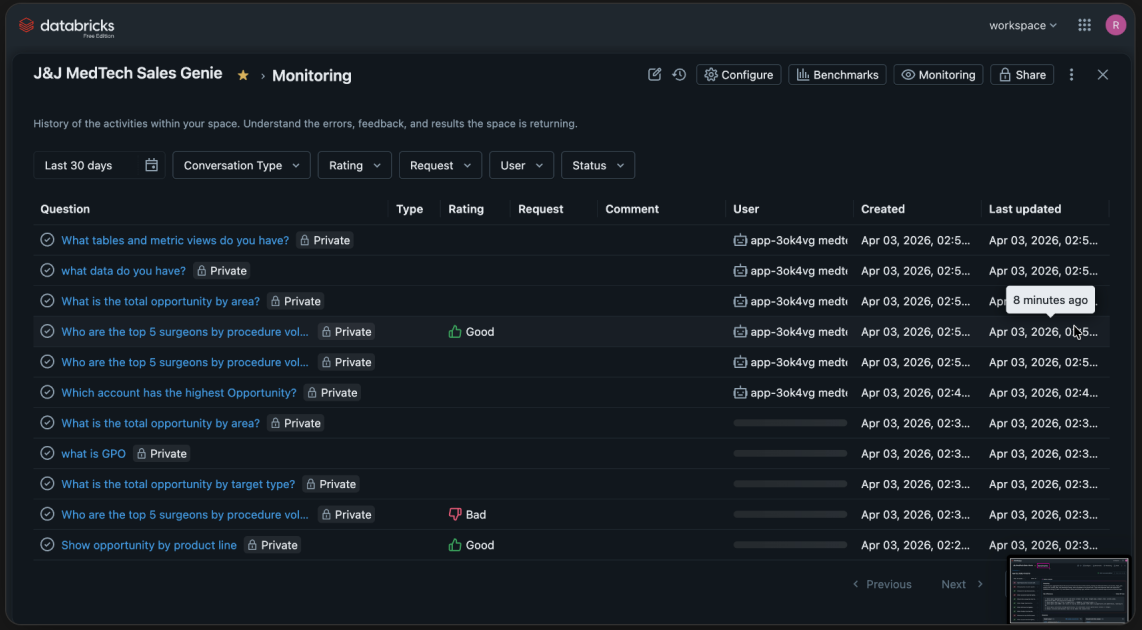
Replace disconnected BI tools, spreadsheets, and ad-hoc databases with a single AI-native platform — data, analytics, and AI in one place

Built-in Governance

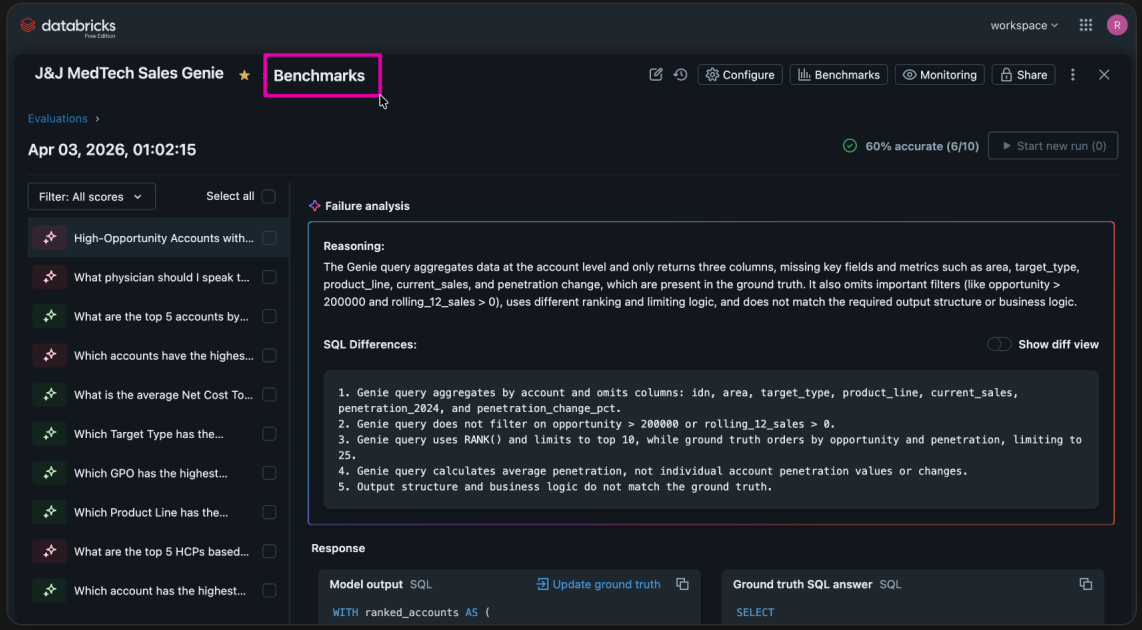
Unity Catalog provides fine-grained access controls, audit logging, and data lineage — no separate governance layer to buy or maintain

Scale Without Complexity

Metric views, AI evaluation benchmarks, and conversation monitoring are native — not bolted on from third-party vendors



Built-in conversation monitoring & quality ratings



AI accuracy benchmarks — 69% baseline with failure analysis

BUSINESS CASE

Return on Investment

3–5x

Productivity Multiplier

Sales reps reclaim 12+ hours/week for customer-facing activities

40%

Lower Platform TCO

Consolidate 5+ analytics and reporting tools into one unified platform

$129M

Pipeline Visibility

Full opportunity coverage across upgrades, competitive, and expansion

Bottom line: An AI that enables chat and voice-to-insights from structured enterprise datasets replaces manual reporting workflows, surfaces revenue opportunities faster, and runs on a platform that eliminates the hidden costs of tool fragmentation.

PATH FORWARD

Recommended Next Steps

1. **Pilot with 1-2 Sales Territories**
   Deploy Ask Genie to a focused group of reps — measure time savings and adoption over 30 days
2. **Benchmark AI Accuracy to 85%+**
   Use built-in evaluation framework to refine query accuracy from 69% baseline with targeted improvements
3. **Expand Data Sources**
   Integrate CRM pipeline data, clinical evidence, and competitive intelligence for richer AI context
4. **Scale Across MedTech Commercial Org**
   Roll out to all territories and product lines — replicate the pattern for wound closure, biosurgery, and ortho
